CUSTOMER OVERVIEW

The University of Brighton operates a complex higher-education network supporting teaching, research, and essential campus services. The Network Services team is responsible for maintaining availability, security, and consistency across approximately **900** network devices.

NETWORK ENVIRONMENT

The environment includes infrastructure from HPE Networking, Extreme Networks, and APC, spread across multiple locations and use cases typical of a modern university campus.

ABOUT LOGICVEIN THIRDEYE SUITE

LogicVein ThirdEye Suite is an all-in-one network management platform that delivers complete visibility, configuration management, compliance monitoring, and secure access – helping network teams work smarter and faster.

“ThirdEye Suite has become an essential part of our day-to-day operations. It gives us the visibility and efficiency we need to keep our network running smoothly.

– Network Services Manager, University of Brighton

CHALLENGE

Before adopting LogicVein's ThirdEye Suite, the university relied on several small, independent tools. Some products were approaching end-of-life, while others addressed only specific needs. This resulted in:

- Multiple point solutions increasing complexity and operational overhead
- Time-consuming routine tasks such as adds, moves, and changes
- Limited visibility of inventory, versions, and end-of-life status
- Difficulty planning refresh projects without accurate lifecycle information
- Limited flexibility from evaluated single-vendor systems

SOLUTION

LogicVein's ThirdEye Suite was selected to consolidate network monitoring and configuration management into a single, flexible platform.

Deployment began in April 2022 and was completed without issue. Any minor early issues were resolved quickly, supported by regular product updates and responsive vendor support.

RESULTS & BENEFITS

Since deploying LogicVein's ThirdEye Suite, the University of Brighton has achieved measurable improvements:

- ✓ Comprehensive, searchable inventory of network equipment
- ✓ Operational tasks completed faster from a single interface
- ✓ Simplified adds, moves, and changes with powerful search and filtering
- ✓ Better planning and budgeting with dynamic views of device versions and end-of-life status
- ✓ Secure, centralised access via SSH and HTTPS with session logging

“ThirdEye Suite gives us a single source of truth for our network, saving time every day and helping us plan for the future with confidence.

– Network Services Manager, University of Brighton
