

# Better TCO with ThirdEye Suite

## INTRODUCING THIRDEYE SUITE BY LOGICVEIN

ThirdEye Suite is LogicVein's comprehensive network automation and observability platform, designed to deliver exceptional value by eliminating hidden costs that erode IT budgets. Built for scalability, ease of use, and rapid return on investment, ThirdEye Suite streamlines network management from day one—without the need for expensive hardware, proprietary databases, or disruptive licensing models.

## TRUE COST SAVINGS WITH THIRDEYE SUITE

ThirdEye Suite is engineered to minimize the total cost of ownership (TCO) by removing barriers and overhead common in legacy network management solutions:

- No External Database Costs: All core platform capabilities run without requiring extra database licenses or costly client access licenses.
- No Additional OS Fees: ThirdEye Suite operates without extra operating system expenses that escalate with each added core or server.
- Bundled Automation Playbooks: Automation capabilities—including backups, upgrades, and compliance checks—are included, saving countless engineering hours.
- Single Server, Scalable Deployment: Built for expansion on a single server, scaling up without the need for additional infrastructure.
- Free Updates & Upgrades: Receive all software, feature, and compliance updates with current support.

## NO HIDDEN COSTS, JUST RESULTS

With ThirdEye Suite, customers avoid the surprises that drive up costs with competitors' platforms:

- Lower Downtime Risk: Instant rollback, comprehensive change detection, and proactive compliance reduce outages and service disruptions.
- Lightweight Footprint: No proprietary hardware or resource-heavy appliances required.
- Multi-Vendor Device Support: Broad native compatibility eliminates custom scripting or third-party add-ons.
- Intuitive Interface: Fast learning curve and low training overhead save time and money.
- API-Driven Automation: Seamless integration with existing systems maximizes current investments, reducing rip-and-replace scenarios.
- Effortless Scaling: Manage thousands of devices without a linear increase in admins or cost.
- Compliance & Audit Efficiency: Built-in compliance checks simplify audit preparation and minimize the risk of fines.
- Minimal Maintenance: Robust support and frequent updates reduce operational burdens.

## TRANSPARENT, CLIENT-DRIVEN LICENSING

LogicVein's licensing model is designed for simplicity and predictability:

- Per-IP License: Only pay for the number of managed IP addresses, not by modules, services, or ports.
- No Extra Charges: All features, adapters, and playbooks are included—no hidden fees for new device integrations.
- All-Inclusive Support: 24/7/365 remote support and continuous development are standard.
- Client-Driven Roadmap: Customers can request new features or integrations at no additional cost; product evolution is directly informed by real user feedback.

## SUMMARY: FASTER ROI AND LASTING VALUE

ThirdEye Suite delivers sustainable value by automating time-consuming tasks, slashing operational costs, enabling straightforward scalability, and providing unrestricted support—all within a transparent and predictable pricing structure. Network teams are empowered to focus on high-value initiatives that propel business performance, not buried by hidden costs or complex management.
