

## Net StreetDancer VS Tera Term Macro

Parameters	Features	Net StreetDancer	Tera Term Macro
Device	SNMP	○	×
Discovery	CLI ARP Cash	○	×
	CLI OSPF Neighbor	○	×
	CLI EIGRP Neighbor	○	×
Configuration Management	Capturing Configuration	○	○
	Configuration Change History	○	×
	Configuration Comparison	Comparison among the same devices or between devices	×
	Configuration Restoration	○※1	○
	Search by String	○	×
Collecting Device Property	OS Version	○	○
	Vendor/Model	○	○
	Memory	○	○
	CPU	○	○
	Serial Number	○	○
	Card/Slot Number	○	○
Search Capabilities	IP (IPv4/IPv6)	○	×
	Device of Subnet (IPv4/IPv6)	○	×
	IP Address of Interface	○	×
	Host Name (Wild card allowed)	○	×
	Vendor/Model (Wild card allowed)	○	×
	OS Version (Operator allowed)	○	×
	Custom Tags	○	×
	String of Configuration	○	×
	ARP Table of Entire Network (IP)	○	×
	ARP Table of Entire Network (MAC)	○	×
	Switch Port of Entire Network/IP	○	×
	Search Connection Neighbor	○	×
	Change Tools	Command Runner (Specifying multiple commands allowed)	○
Smart Change		○	×
Information Collection Tools	DNS Lookup	○	○
	Interface Brief	○	○
	IP Routing Table	○	○
	ARP Table	○	○
	Ping	○	○
	Port Scan	○	○
	Traceroute	○	○
	SNMP System Information	○	○
	Firewall Model	○	○
	Hardware Summary	○	○
	Interface Summary	○	○
	MAC Transfer Table	○	○
	VLAN Membership Information of Port	○	○
Reporting Features※2	Inventory Report	○	×
	Configuration Change Report	○	×
	Hardware Report	○	×
	Hardware Change Report	○	×
	Backup Failure Report	○	×
	Network Hardware Summary	○	×
	Protocols/Credentials	○	×
	Software Summary	○	×

Job History	Interactive Execution History	○	×
	Scheduled Execution History	×	×
	Execution Start/End Time	○	×
	Execution User	○	×
Credentials/Protocols	Assignment by Specific IP	○	-
	Assignment by Specific IP Range	○	-
	Assignment by Subnet	○	-
	Assignment by Specifying Multiple IPs, IP Ranges, and Subnets.	○	-
Access Control	Set roles	○	-
Custom Tags	Organize Devices by Tags	○	-
	Multiple Tags per Device	○	-
	Tag Search (with AND/OR Logic)	○	-
Compliance	Detect Difference of Current/Saved Config	○	×
	Customize Rule/Policy	○	×
	Detect Violation of Setting Policy	○	×
Terminal Proxy	Telnet Access to Server	×	×
	SSH Access to Server	○	×
	Automatic Login to Device	○	×
	Search Operational Log	○	×
	Login Restriction by User	○	×
Web Interface	Adobe Flash Base	○	×

※1: When you operate configuration restoration, it is necessary to operate it not by Change Tool but clicking button of device configuration window.

※2: Report type can be selected from html or PDF (EXCEL and CSV partly supported).

※ Please note that there is a case that product specifications and descriptions can be changed without notice.

※ 2012/6/18 Inspection by LogicVein, Inc.
